MEASUREMENT

The paper's width is measured according to columns and the paper's height is measured according to inches. One page in the paper is 5 columns wide and 13 inches high. As each column is 1.875 inches, the total one-page dimension is 10.25 x 13 inches.

CALCULATING PRICE

\$12 per column inch

In order to calculate price:

Width in columns x height in inches x rate

For example:

A 2x6 ad (2 columns wide and 6 inches high) from a local advertiser would cost:

$$2 \times 6 \times 12 = \$144$$

Basic ad sizes:

Full page, 5 columns x 13 inches= \$780

Half page, 5 columns x 6.5 inches= \$390

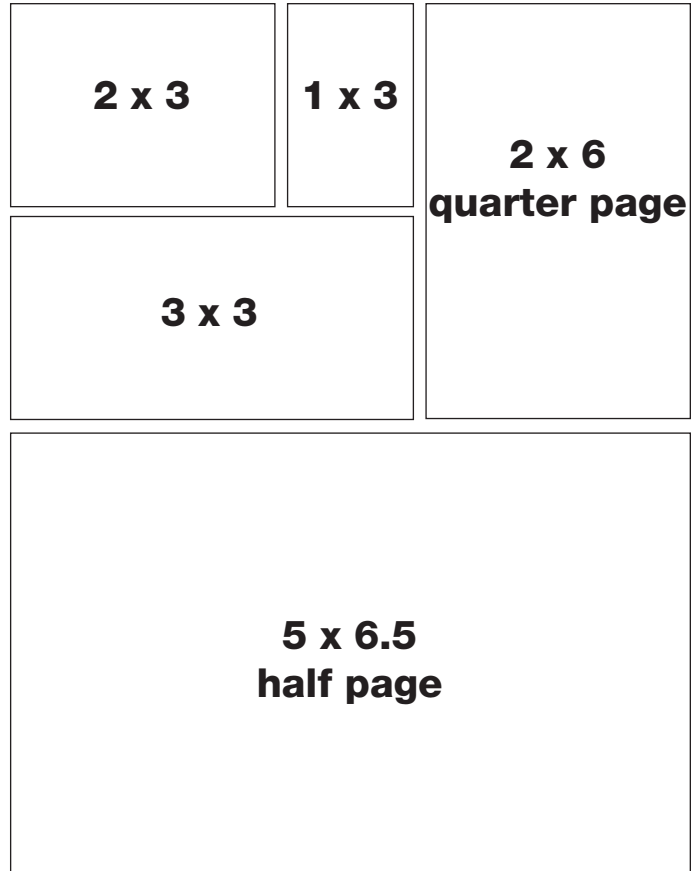

Quarter page, 2 columns x 6 inches= \$144

Business card size, 2 columns x 2 inches= \$48

All submitted ads must maintain correct proportions. If your ad is not this size, please measure it and choose proportions that will fit. Otherwise, the ad will be shrunk or enlarged as necessary. See "submitted guidelines" or the inside of this card for more information.
